

Proposal: Adding more K1 Seats

Lisa Jeanne Graf, written September 2018

Currently there are several elementary capacity schools with low enrollment. At the same time there is a need for more space for K1 seats. Some of those capacity elementary schools could add K1 seats.

This would be positive for several reasons:

- Increased enrollment would make better use school buildings
- Increased enrollment would help school budgets
- This could possibly also help add diversity to schools
- This approach would ensure that low enrollment schools are not closed, maintaining stability for school communities.
- This approach would allow for new K1 seats to happen in the district and not through private preschools
